PROFESSIONAL SUMMARY

Cybersecurity undergraduate focused on SOC operations, threat detection, and incident response using Splunk and ELK. Hands-on with log analysis, malware analysis, network traffic analysis, and MITRE ATT&CK. Holds ISC2 CC, Google, and IBM certifications. Ranked **Top 1% globally on TryHackMe**.

TECHNICAL SKILLS

SOC & Blue Team: Threat Detection, Incident Response, Threat Hunting, Log Analysis, Triage, Alert Investigation, Digital Forensics, Phishing Analysis, Malware Analysis (Static), Threat Intelligence
Frameworks & Standards: MITRE ATT&CK, Cyber Kill Chain, OWASP Top 10, NIST CSF
SIEM & Monitoring: Splunk Enterprise (SPL), Elastic Stack (ELK), Microsoft Sentinel, Azure Log Analytics, Sysmon, Zeek, RITA
Network & Packet Analysis: Wireshark, tcpdump, hping3, dns recon, Nmap, Snort (IDS/IPS), Network Traffic Analysis, C2 Detection
Security Tools: Burp Suite, Metasploit, John the Ripper, Hashcat, VirusTotal, Any.run
Cloud Security: AWS, Microsoft Azure (Sentinel, Log Analytics, Azure Monitor, Defender)
Programming & Scripting: Python, Bash, C++, Java, PowerShell
OS & Environments: Linux (Ubuntu, Kali), Windows Event Logs, Active Directory, Networking

PROJECTS

Machine Learning-Based Intrusion Detection System (IDS) | Python, Scapy, Scikit-learn [GitHub](#)
– Developed a real-time network intrusion detection system using Python and Scapy for live packet capture and traffic classification across 9,000+ labeled samples.
– Applied feature engineering and trained supervised ML models to distinguish malicious from benign traffic; integrated IP reputation APIs for threat intelligence enrichment, improving detection accuracy.

SIEM Log Analysis & Threat Detection – Elastic Stack (ELK) | ELK Stack, Zeek, RITA, Kibana [GitHub](#)
– Ingested and parsed Linux system logs and Zeek network logs into Elasticsearch via Logstash pipelines; wrote detection rules and correlation queries to identify anomalies and lateral movement indicators.
– Conducted C2 beaconing detection using RITA (Real Intelligence Threat Analytics); built custom Kibana dashboards for SOC analyst workflow and real-time alerting.

Real-Time Endpoint Monitoring & Alerting – Splunk SIEM | Splunk Enterprise, Sysmon, SPL [GitHub](#)
– Designed and deployed Splunk dashboards to monitor endpoint telemetry including process execution, network connections, file hashes, and authentication events using Sysmon log ingestion.
– Authored SPL queries for log correlation and wrote automated alert rules for failed login attempts, privilege escalation indicators, and suspicious process launches.

EXPERIENCE

AMD Slingshot Hackathon 2026
– Built and deployed a full-stack health tracker within a 2-hour vibe coding challenge; handled end-to-end development and deployed the application live on Google Cloud.

HackZero'26 CTF | Team snortX | OWASP VIT Bhopal March 2026
– Competed in a 24-hour CTF event solving challenges across web exploitation, cryptography, forensics, and OSINT; collaborated as part of Team snortX at VIT Bhopal University.

EDUCATION

Vellore Institute of Technology, Bhopal | **CGPA: 8.93 / 10.0** September 2023 – May 2027
– Bachelor of Technology in Computer Science & Specialization in Cyber Security and Digital Forensics

CERTIFICATIONS & ACHIEVEMENTS

ISC2 Certified in Cybersecurity (CC) | Google Professional Cybersecurity Certificate | IBM Cybersecurity Analyst Professional Certificate
TryHackMe – SOC Level 1 Analyst Path | Cisco Cybersecurity Certificate | NPTEL: Blockchain & Applications (Branch Topper)
Top 1% globally on TryHackMe | **400+ DSA problems** solved | **NPTEL Branch Topper** – Blockchain and its Applications
